

AGED CARE PROGRAM

IT IS A LEGAL REQUIREMENT THAT ALL DOGS ENTERING THE PETS HOTEL MUST HAVE PROOF OF A CURRENT C5 VACCINATION.

PLEASE ENSURE THAT THIS IS ARRANGED AS REFUSAL OFTEN OFFENDS.

At The Pets Hotel Country Club we realise that our beloved friends enter their elderly years at the age of 12 and with this may come similar conditions to that of an 80-year-old human.

Though they may appear to be in good health externally, sometimes their body can be showing more than their age internally.

It is for this reason, it is a requirement that all pets aged 12 years and over are automatically placed onto our Aged Care Program. For the small cost of \$5 per day* you will receive a written report of our extensive daily records upon check-out.

The Pets Hotel Country Club may also recommend the Aged Care Program for pets that are senior in age or require additional monitoring or medications. This will be fully explained to all owners prior to check-in.

Our Aged Care clients have intensive monitoring and recording as well as three Mini Yaps per day; this helps us to recognise any subtle signs that an unwell senior may show and enable us to quickly take action to treat any ill health with the assistance of our Veterinarian.

Also included in the price is the administration of any medication that your pet requires.

Our Pet Attendants take records at key intervals of the day regarding the following;

- Appetite
- Fluid intake
- Urine
- Bowel movement
- Body movement, and
- Any medications/ medical concerns (if applicable)

We trust your understanding in our interest to provide the best possible care to your pet/s while you are away.

The Pets Hotel Country Club advises against boarding guests that have a terminal illness and are in the late stages of that illness.

**Minimum accommodation requirement of Conservatory Suites to ensure your pet's climate can be monitored with more accuracy.*
